TEAMSTERS FIND WAGE SCALE IS ABOVE ONE ASKED

Strike Ends When Men Learn Bonus System Raises Pay Above Demands

Honolulu Construction & Drying Company teamsters, who met Tuesday night and decided to strike for higher wages, all returned to work this morning, with the exception of their leader, John Kanaka, following a talk with the company manager, J. J. Belser.

The chief demand of about 200 employees seemed to be for a raise of 25 cents a day. Belser explained to them that under the bonus system of six cents a load which has recently been put into effect by the company, the least the men would make in bonuses would be 24 cents a day, or a cent less than their demands, while on the other hand often the bonuses would far exceed this figure.

The bonus plan allows six cents a load to drivers and four cents to help-ers. Belser talked with the men last night, but they held out for the straight raise, and Belser told the yard foremen to hire new men in the places of all those who did not go to work this morning. Today his plan was accepted and the strike came to end almost before it had started.

Anticipating no trouble but desirous of having his men at hand should there be any, Sheriff Rose sent some mounted men in charge of Captain Baker to the Honolulu Construction & Drying Company yards on South street this morning. The policemen found only a quiet scene of teamsters going peacefully to their work as if nothing had happened.

The men met last night in the vicinity of the stables, moved for a minimum wage of \$2.25 a day, and then marched to Ala Park where the stevedores were celebrating their return to work.

HOWLAND HEIR, TORN BY GRIEF, KILLS SELF

LOS ANGELES.—Harry Howland, 32 years old, a reporter, and a legatee of the Howland estate, which was held in trust by Betty Green to be distributed to the heirs after her death, committed suicide by swallowing poison. He died ten minutes later on the table at the police hospital. It is said Howland's act came as the culmination of grief for his wife, who died about eighteen months ago in Kansas City.

Fire destroyed the plant of the Hydrocarbon Products Company at Lorillard, two miles from Keansburg, N. J. The loss is in excess of \$50,000.

The members of the Catholic Ladies' Aid Society will meet in the Library of Hawaii at 10 o'clock tomorrow morning.

Hawaiian Lodge, F. & A. M., will hold a special meeting at 7:30 o'clock this evening. There will be work in the first degree.

The working party of the British Red Cross was to meet at 2 o'clock this afternoon in the guild hall, church of the Epiphany, Kaimuki.

A meeting of the Mothers' Club of Kaimuki will be held at 2 o'clock tomorrow afternoon in the assembly hall of the Liliuokalani school.

Pastor David Cary Peters of the Christian church will speak at the Y. M. C. A. next Tuesday evening on the subject, "The Romance of the Books."

"Matsonia Special"—a dainty combination of fresh pineapple, whipped cream and ice cream. Try it today at the sanitary soda fountain of Benson, Smith & Co.

There will be a meeting at 4 o'clock this afternoon in the Library of Hawaii of the women who are making plans for sending Christmas presents to the boys in the trenches.

CLAY MINING INDUSTRY

According to the United States Geological Survey, Department of the Interior, the war in Europe has caused a shortage in high grade clay formerly imported from Germany which has seriously affected the manufacture of crucibles and lead pencils in this country.

Efforts have been successful, however, in locating a domestic supply of clays suitable for use in these industries in Arkansas, Illinois, Missouri and Ohio.

Clay mining in 1915 was more prosperous, especially during the latter part of the year, than in 1914, the quantity of clay marketed being 2,362,950 short tons, valued at \$3,971,941, an increase of 153,094 tons in quantity and \$215,373 in value over 1914.

Fire clay is the most important variety of clay, 1,570,481 tons being reported for 1915, valued at \$2,361,482, an increase of 161,014 tons and \$214,205 over 1914.

There were 28,031 tons of domestic kaolin, the purest form of clay, marketed in 1915, valued at \$241,520, a small decrease from 1914.

MONOPOLIES CAUSE TROUBLE

BERLIN, Germany.—The Taegliche Rundschau intimates that the new imperial finance minister, Von Roedern, has been unable to reach an agreement with the federal government respecting the proposed imperial monopolies and that grave trouble may develop in the federal council on the subject.

The cigarette monopoly is especially opposed by Saxony, as more than half of the cigarette making industry is centered in Dresden and the introduction of a monopoly would seriously hit Saxon revenues. Saxony is independently planning a monopoly of electricity.

The report of the American Smelting & Refining Co. for the six months ended June 30 last, shows net income of \$11,145,893.

PINKHAM URGES DELAY ON LOAN FUND PROJECT

(Continued from page one)

lebrand gien flows before you expend public money.

"Throughout the length and breadth of the United States an urgent growing public sentiment is insisting on all possible accurate knowledge and definite, well-thought-out plans for all public utilities, particularly those involving public funds, or private utilities by grants compelling public patronage before adoption or execution of the projects.

"In this spirit I have endeavored to serve the territory and the city and county of Honolulu.

"The future of Oahu, through rapidly developing plans and coming tremendous increase of the forces of the United States army and navy on this island, indicates only the most intelligent and soundest methods will serve the needs of this community.

"Having laid this matter carefully before you, my duty is performed.

"Respectfully and sincerely,
"LECHES E. PINKHAM,
"Governor of Hawaii."

Chairman Charles R. Forbes of the loan fund commission called the meeting to order, stating to the governor that the plans and specifications are complete but that before bids are called for it had been deemed best to confer with him as head of the territory that there might be a general understanding on the matter.

"We would like to know if you wish to express yourself before calling for bids," he said.

Forbes then called upon Engineer James T. Taylor to outline his work and the results of his investigations.

As Taylor rose to give his report, T. F. Sedgwick rose also to express himself as a citizen, he said.

"I want to express myself in regard to the Nuuanu dam," he broke in. "I want to say that I am opposed to the diverting of any water into No. 4 reservoir."

Taylor brought out the fact that his plans for Hillebrand gien take in 175 acres more of drainage area than feed Maole stream.

He said that an open ditch is much better than a pipe in that it will permit enlargement for future needs. It will also outlast a pipe, he pointed out.

"I have figured an average rainfall of 132 inches or 11 feet a year," he stated, "and of this amount on a 200-acre area, 50 per cent should flow into the ditch. This would mean 1,480,000 gallons daily or 535,000,000 gallons a year.

"The present cost estimate is \$33,500 as submitted to the loan fund commission. I figure the cost at \$23,998.35. The difference lies largely in the estimated cost of a dam of which there is no need. All you need is simply a structure to divert the flow, and there is no site for a dam.

"Construction will be very simple and work can be carried on night and day."

The commission now has an unobligated balance of \$39,946.95. Taylor pointed out that the value of water derived from the project is worth at least \$5000 a year for domestic and irrigation purposes.

In response to an inquiry from the chairman, Taylor stated that the Nuuanu dam leakage is less than 1-2-3 per cent.

"Don't you think that your 50 per cent run off allowance is a little shaky?" asked Hydrographer Larri-son.

"I do not."

"I don't criticize your figure," Larri-son added, "but I'm doubtful of how you could work them out. The run off has varied from nothing to 80 or 90 per cent. I think the rainfall figures are conservative, but I think it is impossible to get the run off without waiting until we have measured for the wet season—till January, at least. We began measuring in May."

Governor Pinkham agreed with Larri-son on the suggestion to wait for a time. Harry Murray, superintendent of the city water department, objected, however.

"The power value would be not less than \$500 a year," he said. "It ought to be started at once as an investment. If we wait until January we can't begin construction then for six months because of the wet season."

According to a statement issued by the Interstate Commerce Commission, 96 railroads, operating 116,338 miles during July, show a gross earning of \$177,525,651.

Electric massaging apparatus which emanates violet rays has been invented for imparting a general tonic effect to the scalp and face.

31,416 PUPILS ARE IN SCHOOL IN HAWAII NOW

Approximate Enrolment Figures Show Gain of 1211 Students Over Last Year

Approximately 31,416 students are enrolled in the public schools of the territory to date, according to figures compiled at the department of public instruction. Although the figures now at hand are only approximate the department expects to have the exact enrolment by the end of this week or the first of next week.

The public schools of Oahu show an attendance of 12,814. Added to this figure is the enrolment in the high school and normal school, 460 and 390, respectively, bringing the Oahu total to 13,574.

Mau's enrolment is 4676 and that of Kauai 4077, including the high school. West Hawaii has 2794 students in school and East Hawaii, including the Hilo Union schools, with an enrolment of 1143, has 6013.

The boys' and girls' industrial schools on Oahu have a total enrolment of about 200, and the Pa Ola day camp has about 25. These, with the 12 pupils in the school for defectives brings to an approximate total of 31,415. This is an approximate gain of 1211 over the enrolment when school closed last June.

HUGHES MADE NO AGREEMENTS, HE TELLS AUDIENCE

(Associated Press by Federal Wireless) CLARKSBURG, W. Va., Oct. 11.—Candidate Charles E. Hughes made a speech here today before a large crowd. He declared that he has made "no agreements" with anybody in his campaign for election.

"I stand for American rights throughout the world, without fear or favor," he declared.

CITY AFFAIRS AND SUPERVISOR NOTES

The next meeting of the board of supervisors will be held Tuesday, October 17.

The receipts to the city from the Hawaii Polo Association for the use of Kapialani park are \$1052.99.

For the construction of a coral road in the Queen street extension project, a resolution was passed by the supervisors appropriating \$1000.

A resolution appropriating \$199 to hire a man for the next three months to keep the streets about the markets on King street clean was passed Tuesday night.

The board of supervisors Tuesday night passed the first reading of a resolution appropriating \$300 to repair the roads in the Laimi park and Puhiwa road improvement district.

Supervisor Charles Arnold announced that plans for the improvement of Beretania street from Nuuanu street to the junction of King street would be presented to the board in two weeks.

A resolution appropriating \$500 for repairing the roof and gutter of the Central fire station on Beretania street was approved by the board Tuesday evening. Hatch said that if they were not repaired it is likely serious damage may result.

Arnold, chairman of the road committee, said that the delay in the repairs on Nuuanu street was caused by the absence of residents which prevented the collection of assessments. He thought, however, that there were other streets in Honolulu which needed repairs far more than Nuuanu street.

HARPOON DATED 1861 FOUND IN SWORDFISH

LOS ANGELES, Cal.—The body of a large swordfish was washed up on the shore near the mouth of Topanga canon. The fish had been dead but a short time. Firmly imbedded in its back was part of a harpoon. It was badly rusted, but when extracted the name of "Leeds" and the figures 1861 were discernible.

Say So

When You Have Something the People Need, Tell 'em About It.

That is the fundamental of Paid Publicity. People Can't Learn unless they are Told. Leave them to "Hearsay" and they finally get so that they do not know what to believe and they Believe Nothing.

Paid Publicity puts Facts Before the People in a Direct and Convincing Form. It enables the People to Know.

Paid Publicity helps you to be Properly Known and Understood by those whose business or personal support you wish to secure.

Paid Publicity is Power.

Opening of the Lamp Season

Newest Lamps and Shades for These Long Evenings

The time when there is more pleasure to be had from an Electric Lamp than from almost anything else, and nothing adds more to the charm of a living or dining room.

It is really surprising what splendid lamps we are showing in this department at most inexpensive prices. Beginning as low as \$5.00, our prices run up as high as one wants to go.

We are also equipped to make lamps and shade frames of every description.
